

PROJECT & PARTNERSHIP PORTALS

COORDINATION AND MIS FOR STRATEGIC PARTNERSHIPS

Strategic Partnerships are now a key feature of both the public sector and private sector landscape.

Public services strive to achieve 'joined up' government, shared services or emergency response coordination. Large scale private sector projects are often dependent on multiple partners who need to work in a seamless way.

Recruiting, informing, coordinating and co-developing plans and content with partners is a huge task, but one which the Web 2.0 environment is able to transform.

Old technologies, including the first generation of web-based services such as email and shared servers, are limited by their inability to enable active dialogue, sharing and collaboration. Multiple versions of any communication start to proliferate, have to be stored and tracked and make the task of achieving consensus ever more difficult.

Information becomes hard to keep up to date, and partners have to manage their own filing and data sharing, inevitably leading to unequal distribution of knowledge. Preparing plans which everyone has contributed to and everyone understands and can access as needed, is immensely difficult – until now.

MAKING IT EASY TO SET UP, MANAGE, INFORM AND CO-DEVELOP WITH STRATEGIC PARTNERS

A pioneer of the Web 2.0 generation of online self-service communities, INOVEM has developed INOVEM Inclusionware™ to provide a complete management information system (MIS) and collaboration capability to those charged with managing or supporting strategic partnerships and major partnership projects.

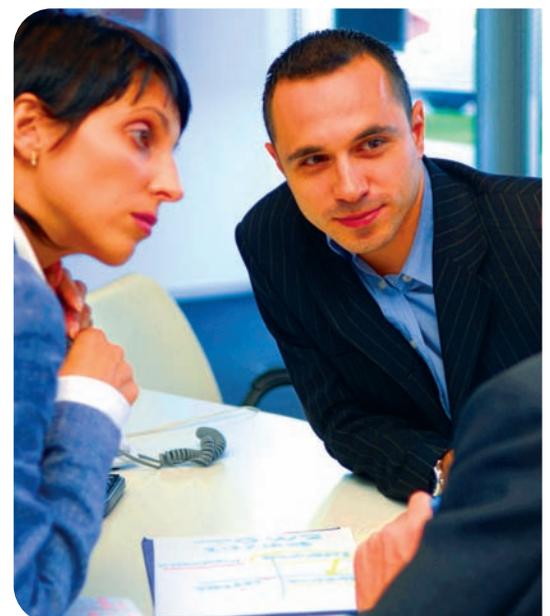

Our powerful web-based INOVEM Project & Partnership Portal solution provides a single, integrated and secure environment in which you can cost effectively connect partners, share, discuss and manage documents, manage timelines and meetings, issue information consistently with automated alerts, and track progress.

The software is extremely quick to setup and is designed to be simple for project managers and partnership members to access, manage and work with. Its simplicity means there is very little, if any, training required or burden on your IT department.

Developed to work with all commonly used web browsers and email clients, INOVEM Project & Partnership Portal will help partners to access project information and participate in planning from wherever they happen to be.

It will integrate effortlessly with your users' email client and ensures notifications and follow-up discussion threads are automatically linked to related content, re-enforcing both context and understanding.

Users can be members of an unlimited number of teams, workgroups or projects within which they can be given various levels of access and control. For extra security, data can also be encrypted via SSL (Secure Sockets Layer) if required.

YOUR INOVEM PROJECT & PARTNERSHIP PORTAL SOLUTION INCLUDES:

- our powerful team working environment, INOVEM Collaborate, designed to improve project management, group-based communications and the rapid, effective sharing of information among public and private communities
- simple, easy-to-manage multi-user document creation, workflow and PDF publishing capabilities through INOVEM Co-Publish
- the option to easily add one of our e-consultation and community-building products, INOVEM Connect or INOVEM Consult, to add further networking and research capabilities to your solution

Your system will also benefit from the unique INOVEM Chameleon™ approach, delivering seamless integration into your branded communications, now and into the future. Instead of just offering 'Your logo here' branding on a standard design template, we can integrate the solution fully within your own web identity.

BENEFIT FROM THE WORLD'S No. 1 INCLUSION SOLUTION

INOVEM Inclusionware solutions have already helped many public and private sector organisations in the UK and US to improve project and partnership collaboration, build agile workgroups and communities, and ensure proper consultation.

Our browser-accessed software is designed to be easy to obtain, set up, manage and use, requiring no proprietary downloads or plug-ins to your browser. It can be purchased or provided as a fully supported and secure hosted service, providing variable levels of authorised access. All INOVEM Inclusionware meets government and Internet accessibility standards (WAI-AAA).

As part of our service offering we provide you with highly responsive, high quality support to help you get the best out of our software, and adapt to changing circumstances. Training is provided, but our system is so easy to use that users can easily train each other and new starters can be up and running very quickly.

“ In a couple of weeks INOVEM delivered a fully branded and secure web portal, provided training for managers and staff and helped us create and deploy our initial set of groups. The resulting solution, FirelinkMIS.net, is now a core part of the day-to-day communication for the Firelink project, with over 9GB of data, 300 users and 100 groups. ”

Terry Mason,
Firelink Project Office

WITH THE INOVEM PROJECT & PARTNERSHIP PORTAL SOLUTION YOU CAN:

- provide a secure, easily maintained site where up-to-date information can be quickly accessed and plans co-developed
- save time and reduce errors, allowing partners to keep in touch on fast moving and dynamic projects, through instant notifications
- ensure project status, milestones and information are communicated to the project team and other stakeholders efficiently and consistently
- maintain an audit trail of versions, histories, updates and comments on documents and other information
- log, share and resolve risks and issues
- reduce time and effort spent searching for data by existing or new partners, providing a single Management Information System
- lessen the burden on central IT resources
- provide a consistent framework for engagement, internally and externally
- minimise environmental impact by reducing travel and document printing

“

The council were delighted that a Parish Council took up the offer to use the INOVEM system as part of their Parish Plan exercise. The system has allowed the Parish to offer not only an online questionnaire but also a tool to analyse the results of their consultation. It also offers multiple data entry thereby speeding up the data inputting and not relying on one volunteer to do all the work. It is also very easy to use, so training doesn't have to be intensive. ”

Sara Dixon,
Policy and Partnerships,
Bath and North East Somerset Council

LET'S GET TOGETHER

ABOUT INOVEM

INOVEM is the inventor of Inclusionware™
– democratic web-native systems for
collaboration, consultation and inclusion.

Our solutions are used by central and
local government, planning authorities,
consulting firms, corporates and
representative organisations around
the UK and US, to empower people
to work together better.

Our innovative Web 2.0 technology
enables people who want to involve,
consult or collaborate with others
to do so quickly, economically and
without unnecessary barriers.

For those who want to consult the
public, involve a community, manage
a partnership or just work closely
with colleagues, INOVEM gives
you the place to do it – fast.
