

# INCLUSIONWARE FOR LOCAL HEALTH TRUSTS

Meeting your 'duty to involve'

Involvement will mean developing new and innovative ways of devolving power and influencing decision-making. INOVEM's pioneering Inclusionware solutions are ideally suited for a wide range of engagement activities that include community consultation and partnership collaboration.

## **INOVEM Inclusionware will:**

- Help you to standardise and build robust involvement practices that will stand up to scrutiny
- Make it easier and more affordable to involve patients, carers, the public and key partners and help you achieve compliance
- Automate the reporting on consultations, involvement practice and outcomes
- Provide an alternative method for those affected by proposed changes to have a chance to 'have their say' and offer their contribution and for people to influence the agenda from the outset
- Record and analyse the views of all relevant groups and audit how they have been taken into account
- Ensure that the consultation is as effective as possible and 'consultation fatigue' is minimised
- Help you to build up local membership by forming joint governance and planning arrangements with the local councils
- Offer new and innovative ways to target and seek views of your local population to complement the existing range of methodologies used
- Provide a framework for continuous and meaningful engagement with staff, the public and patients.
- Provide a collaborative environment in which you can jointly develop service specifications and draft tenders as well as work with preferred providers

"Oxfordshire PCT chose INOVEM's Inclusionware software solution as a key part of our commitment to improving and strengthening engagement and involvement with patients, the local community, partners, and voluntary organisations in designing, planning and delivering local healthcare services to support the trust's commitment to world class commissioning"

“.. we are also extending the use of our eConsultation service to our Primary Care Trust, in order that we can provide local residents, business and interest groups with a joined-up approach to consultation in Herefordshire”

Martin Heuter, Herefordshire Partnership

## ABOUT INOVEM

INOVEM is the pioneer of Inclusionware™ – democratic web-native systems for collaboration, consultation and inclusion.

Our solutions are used by central and local government, planning authorities, consulting firms, corporates and representative organisations around the UK and US, to empower people to work together better.

Our innovative Web 2.0 technology enables people who want to involve, consult or collaborate with others to do so quickly, economically and without unnecessary barriers.

For those who want to consult the public, involve a community, manage a partnership or just work closely with colleagues, INOVEM gives you the place to do it – fast.

## BENEFIT FROM THE UK'S NO.1 INCLUSION SOLUTION

INOVEM has been working with local authorities, strategic partnerships and others involved in the local government arena since our foundation in 2001.

Our browser-accessed software is designed to be easy to obtain, set up, manage and use. It can be purchased or provided as a fully supported and secure hosted service, providing variable levels of authorised access.

INOVEM Inclusionware™ has been designed to create a single, simple yet multi-functional environment which connects everyone authorities need to collaborate with, consult or inform. This brand has been designed to encompass the key traits of the software, in that:

- It's easy for people to access, manage and use
- It's about getting more people involved in decisions
- It helps authorities and companies to be more 'inclusive'

As part of our service offering we provide you with highly responsive, high quality support to help you get the best out of our software, and adapt to changing circumstances. Training is provided, but our system is so easy to use that users can easily train each other and new starters can be up and running very quickly.

All INOVEM Inclusionware meets government and Internet accessibility standards (WAI-AAA).
